

Full Stack .NET Developer - Cloud Enabled Applications

Location: Chennai / Remote | Experience Required: 2 to 5 years

We are seeking a dynamic Full Stack .NET Developer with hands-on experience in ASP.NET Core, C#, and React to join our digital product team. The ideal candidate will have a strong foundation in RESTful API development, SQL, and cloud services (Azure or AWS).

Key Responsibilities:

- Design and develop scalable web applications using ASP.NET Core, Entity Framework, and React.
- Implement secure authentication (JWT), role-based access, and session management.
- Work on cloud-native deployment pipelines using Azure App Services, CI/CD tools, and infrastructure as code.
- Build responsive UIs and interactive components using React, Tailwind, and modern JS.
- Collaborate with product managers, cloud architects, and frontend developers.
- Apply unit testing frameworks like NUnit or xUnit for code quality.
- Document APIs using tools like Swagger/Postman.

Must-Have Skills:

- Strong knowledge of ASP.NET Core, C#, Entity Framework, and LINQ.
- Experience with React.js, JavaScript, and Tailwind CSS.
- Hands-on with SQL Server, PostgreSQL, or SQLite.
- Familiarity with JWT, OAuth, Azure, or AWS (any).
- Experience with Postman, Swagger, GitHub, VS Code, CI/CD tools.

Bonus Points For:

- Knowledge of LLMs, Generative AI APIs, or Google Cloud integrations.

- Experience hosting or leading developer events, workshops, or tech communities.
- Familiarity with Power BI, Figma, or technical documentation.

Why Join Us?

- Work with a forward-thinking product team solving real-world problems.
- Get exposure to cutting-edge cloud and AI-powered platforms.
- Contribute ideas - not just code - in a developer-first culture.
